Thu 8:30 – 10:15 ELB LT3

Course Description

The main topics of this course are: international financial markets, the determination of exchange rates, the relation between exchange rates and inflation, and monetary and fiscal policy under flexible and fixed exchange rates. This course gives students frameworks and analytical tools to think about these topics and apply them to the real world. It will also touch on a number of relevant current issues. Students should have knowledge of elementary differential calculus, and are advised to take ECON2011 and ECON2021 before taking this course.

Learning Outcomes

Upon successful completion of the course, students should be able to understand some simple causal relationships between international macroeconomic events and the reasons why some policies can or cannot be used to deal with some economic problems.

Honesty in Academic Work

Students must observe the University's policy on Honesty in Academic Work
